

# Advantages of Traditional Network Cabinets

## Overview

Traditional racks start at \$400-\$800 for quality units. While this seems higher upfront, these racks often provide better long-term value through durability and upgradability. They're built to last for many years and can accommodate significant equipment additions as your business. Network cabinets are the backbone of modern IT infrastructure — organizing routers, switches, servers and wiring into secure, cool, manageable racks that enable scalability, efficiency, and hardware protection. Simply put, a network cabinet (or network rack) is a metal enclosure used to hold and. As an electronic device storage device specifically designed for installing and managing network devices, network cabinets are typically made of metal materials and have multiple adjustable racks and supporting accessories for organizing and protecting various network devices, servers, and. — Network Infrastructure Specialist, 2025 Industry Report When shopping for an in-wall network cabinet, you'll notice several important measurements. First, these cabinets typically range from 4U to 15U in height. It helps you keep your IT equipment structured and accessible.
