At DesignCon 2026, Samtec showed active demonstrations across two generations of high-speed. The size of a conductor is expressed as AWG (American Wire Gauge); the smaller the number, the larger the wire. Common household wiring is usually 16, 14, or 12 AWG. As an example, the code allows 2 cubic inches of space for each 14-AWG conductor, so if you have two cables with three conductors. Learn how to install a junction box safely, from choosing the right box and mounting it correctly to making secure splices and following basic code-safe practices.
