

Fiber Optic Cable Marking Tag

Overview

When choosing markers for your electrical cables, you want to find a product that will last as long as the cables in your networks. Multilink designs our fiber optic cable identification tags to last longer than typical stick-on labels, making them ideal for long-term application in the field, both indoors and outdoors. Cable labeling during installation. To ensure field service and maintenance run smoothly, telecommunications companies need methods to easily identify their cables. Clearly marking all the fiber optic cables in a network improves technicians' ability to work efficiently and lowers the likelihood your cables will be accidentally disturbed or misidentified. As a result, many companies. You need cable identification products with a customized label for the best results. Whether you want your custom cable markers to include your company's name, logo or an alphanumeric code to identify a specific fiber, your cable identification printer should allow you to have as much or as little information as you require. Telecom companies often. Deciding which product will be right for you depends on your application and preferences. For example, if you think custom colors and engravings will benefit your business, you'll want to choose our custom marker option. Both tags and markers offer benefits, so whether you want something that wraps around your cables or attaches to them, Multilink. Multilink serves companies like yours by engineering and making high-quality telecommunications products. With more than 35 years of experience, we're an industry leader. See our fiber optic cable identification tags online and contact us for a free quote today to learn how a customized cable identification system could improve your network efficiency.
