

# French cybersecurity equipment intelligence

## Overview

This article includes data and charts that illustrate the key patterns observed in AIDE telemetry, highlighting trends in attack volume, infrastructure distribution, and persistence of activity targeting France-based sensors. France has a wide cyber-intelligence reach but keeps its cyber-security functions organisationally separate from its intelligence community. In terms of. It extends and gives concrete form to the guidelines of the National Strategic Review, to make our country a major hub for global cybersecurity. We will train thousands of talented individuals, because tomorrow's war is being won today, in schools, laboratories, start-ups and campuses. France. The Global Cyber Alliance was recently asked about the surge of cyberattacks affecting France and if we see evidence that French infrastructure is being attacked more than before.
