

# How much does it cost to customize a network rack

## Overview

Explore the Equipment Rack Cost Guide to find prices for open frame, enclosed racks, and professional setup costs. The costs associated with rack and stack solutions can vary significantly depending on several factors. These include the size of the installation, the complexity of the equipment, labor costs, and infrastructure requirements. Entry-level racks, such as small wall-mounted units, typically range from \$200 to \$500. Can save 15-25% vs separate purchases. Professional-grade used racks offer excellent value. Office liquidations, datacenter upgrades provide quality options. Save 60-80% vs new commercial. If you look for how much does it cost to make your own server rack you can see dozens of different figures out there. The reason is simple: a rack server is not a single item but a small-scale system including hardware. The good news is that network cabinet prices range from as low as \$100 for basic wall-mounted units to over \$3,000 for specialized outdoor models. However, understanding what drives these costs will help you make a smart buying decision.
