

How to cut a cable tray for climbing

Overview

In the Oglaend System Cutting Guideline you can easily find out what the optimal cutting lengths/intervals are for all modular products. Following the advice given. However, every installation is unique, and sometimes it becomes necessary to cut a cable tray to fit specific spaces or to connect different sections. Properly cutting a cable tray ensures the integrity of the system, safety, and compliance with electrical codes. Structural building members should never be cut, and cable trays should not be installed in hoist ways or where subject to. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met. For licensed electricians, mastering these principles is essential.
