

Introduction to the 16-Channel Distribution Box

Overview

The Behringer P16-D Distribution Module is a 16-channel Ultraset distribution module for the Behringer Powerplay system. It splits one input to eight powered outputs for P16-HQ personal mixers, allowing you to cascade up to six units to support up to 48 mixers from a single source. The Behringer. Do you have a question about the POWERPLAY 16 P16-D and is the answer not in the manual?

Page 1 P16-D 16-Channel Digital ULTRANET Distributor Features • Distribution Hub for P16-I for system expansion • 1 ULTRANET input feeds 8 ULTRANET outputs (RJ-45) • Provides bus-power and 16-channel signal. When used in conjunction with your X32 Digital Mixing Console, Powerplay P16-I Input Module, or S16 Digital Snake, the Behringer Powerplay P16-D 16-Channel Ultraset Distribution Module can provide eight additional Ultraset RJ45 outputs, enabling you to greatly expand your existing Powerplay P16-M. The POWERPLAY P16 system is the easy, affordable way to give live or recording musicians/vocalists what they really want “more me!” When used in conjunction with your X32 Digital Mixing Console, P16-I Input Module or S16 Digital Snake, the P16-D distributor can provide 8 additional ULTRANET RJ-45. Panasonic Modular Distribution Boxes stand out with their stylish design, reliable safety features, and compatibility with all kinds of projects. Available in 16- and 32-module base. The Behringer SD16 stage box brings pristine audio quality and simplified setup to your live performances. With 16 Midas-designed mic preamps, the SD16 delivers clear, detailed sound for every input.
