

What is the connector between the fiber optic cable and the pigtail called

Overview

A pigtail fiber indicates a short length of optical fiber cable that has a pigtail connector (for example, SC, FC, ST, LC, etc.) fitted on one end and the other end undressed (for connection through fusion or splicing) to the main fiber optic cable. Executive Summary: A fiber optic pigtail is one of the most commonly specified yet least understood components in structured cabling. This. Fiber Optic cable termination is the addition of connectors to each optical fiber in a cable. What Is a Pigtail Connector?

Types and Applications A pigtail connector is a short cable with a connector on one. What is a Fiber Optic Pigtail, and What Is It Used For?

Written by Ben Hamlitsch, trueCABLE Technical and Product Innovation Manager RCDD, FOI A fiber optic pigtail is a type of fiber optic cable with only one end that has a factory-terminated connector and the other end exposed as bare fiber.
